EVERYTHING AS STANDARD

EXTERIOR DESIGN

The XPeng G6's exterior design is inspired by the fluid dynamics of water droplets, embodying a sense of freedom and energy. The G6 not only enhances aerodynamics, achieving a drag coefficient as low as 0.248, but also emphasizes the vehicle's youthful and stylish character. The sleek lines and coupe SUV proportions reflect XPeng's vision to not only push the boundaries of innovation but the commitment to blending technological sophistication with modern aesthetics.

BOLD FRONT GRILLE AND INTUITIVE SURFACE DETAILING

The bold front grille and meticulously crafted surface details are designed to not only command attention but to create a seamless visual harmony. This emphasises the car's powerful stance while maintaining a minimalist and modern aesthetic, ensuring that every element serves both form and function.

COLOURS COME AT AN EXTRA COST

ARCTIC WHITE

SILVER FROST

GRAPHITE GREY

MIDNIGHT BLACK

FIERY ORANGE

LIMITED EDITION

SUSPENDED ROOF

The suspended roof enhances the car's dynamic, forward-thinking stance while allowing for a more spacious, airy feel inside. It provides exceptional headroom for both front and rear passengers, merging stylish sophistication with practicality for a more comfortable and open driving experience.

FRAMELESS DOOR & HIDDEN DOOR HANDLE

Frameless doors eliminate obstructions, offering a clearer view and reducing blind spots near the A-pillar, so you can enjoy a more open, unobstructed driving experience.

LED TAILLIGHTS & WIDENED SHOULDER

The rear taillights mirror the headlights, enhancing night visibility and strengthening brand identity. The flared shoulders not only create a more powerful, sensual look from the rear but also increase visual tension, balancing the front-end design and amplifying the car's commanding presence.

INTERIOR DESIGN

GREY

Exudes an effortless elegance. Its soft, refined hue brings a sense of calm and sophistication, offering a serene and timeless aesthetic that elevates the entire driving experience.

BLACK

The sleek black finish radiates a bold, captivating allure. The refined plated decorations reflect light with a subtle, star-like shimmer, adding a touch of mystery and elegance to every detail.

SEEMLESS DASHBOARD

Vector-styled dashboard design seamlessly integrates continuous lines, symbolizing the essence of perpetual motion and the car's commitment to user-centric innovation. 10.2-inch screen directly in front of the driver, while a large 14.96-inch central touchscreen offers high resolution and fast, intuitive controls for all other functions.

Enjoy exceptional comfort with the refined leatherette-covered seats, thoughtfully designed to provide lasting support and elegance.

12 - way power adjustable driver seat

G6 driver seat features industry-leading intelligent comfort configurations, including 8-way power adjustment + 4-way lumbar support, multi-directional tensile surfaces to fit ergonomic curves, and perfect support and wrapping, allowing drivers to always maintain the best driving condition and cope with changing conditions.

6 - way power adjustable passenger seat

The passenger seat has 6-way power adjustment and is equally as comfortable as the driver seat, with three sets of seat memory, heating/ventilation, and supporting cushions to help occupants find the ideal position and posture.

12 - position backrest adjustable rear seat

The rear seats of the G6 are designed for ultimate comfort, with the ability to tilt and recline. The backrest can be adjusted from 27° to 38.4°, offering 12 manual adjustment options. Whether you're seating family or friends, the rear seats can be tailored to provide the ideal position for relaxation, with the flexibility to lie back or sit upright for maximum enjoyment.

COMFORT

For an unparalleled driving experience, the G6 comes with heating and cooling functions for both the front and rear seats. The front seats offer both heating and ventilation, while the passenger seat mirrors the driver's seat with these comfort features. Whether it's a cold morning or a hot afternoon, you and your passengers can enjoy a perfectly climate-controlled seating experience.

EXCELLENCE DEFINING FEATURES

XPENG is driven by a commitment to smart mobility, seamlessly blending advanced technology with everyday usability. The G6 is built to enhance every journey through intelligent systems engineered for precision, comfort, and connectivity.

01

50 Wireless Charging

The G6 features dual 50W wireless charging pads with cooling, conveniently located between the front seats, ensuring your smartphones remain powered and cool during your journey.

02

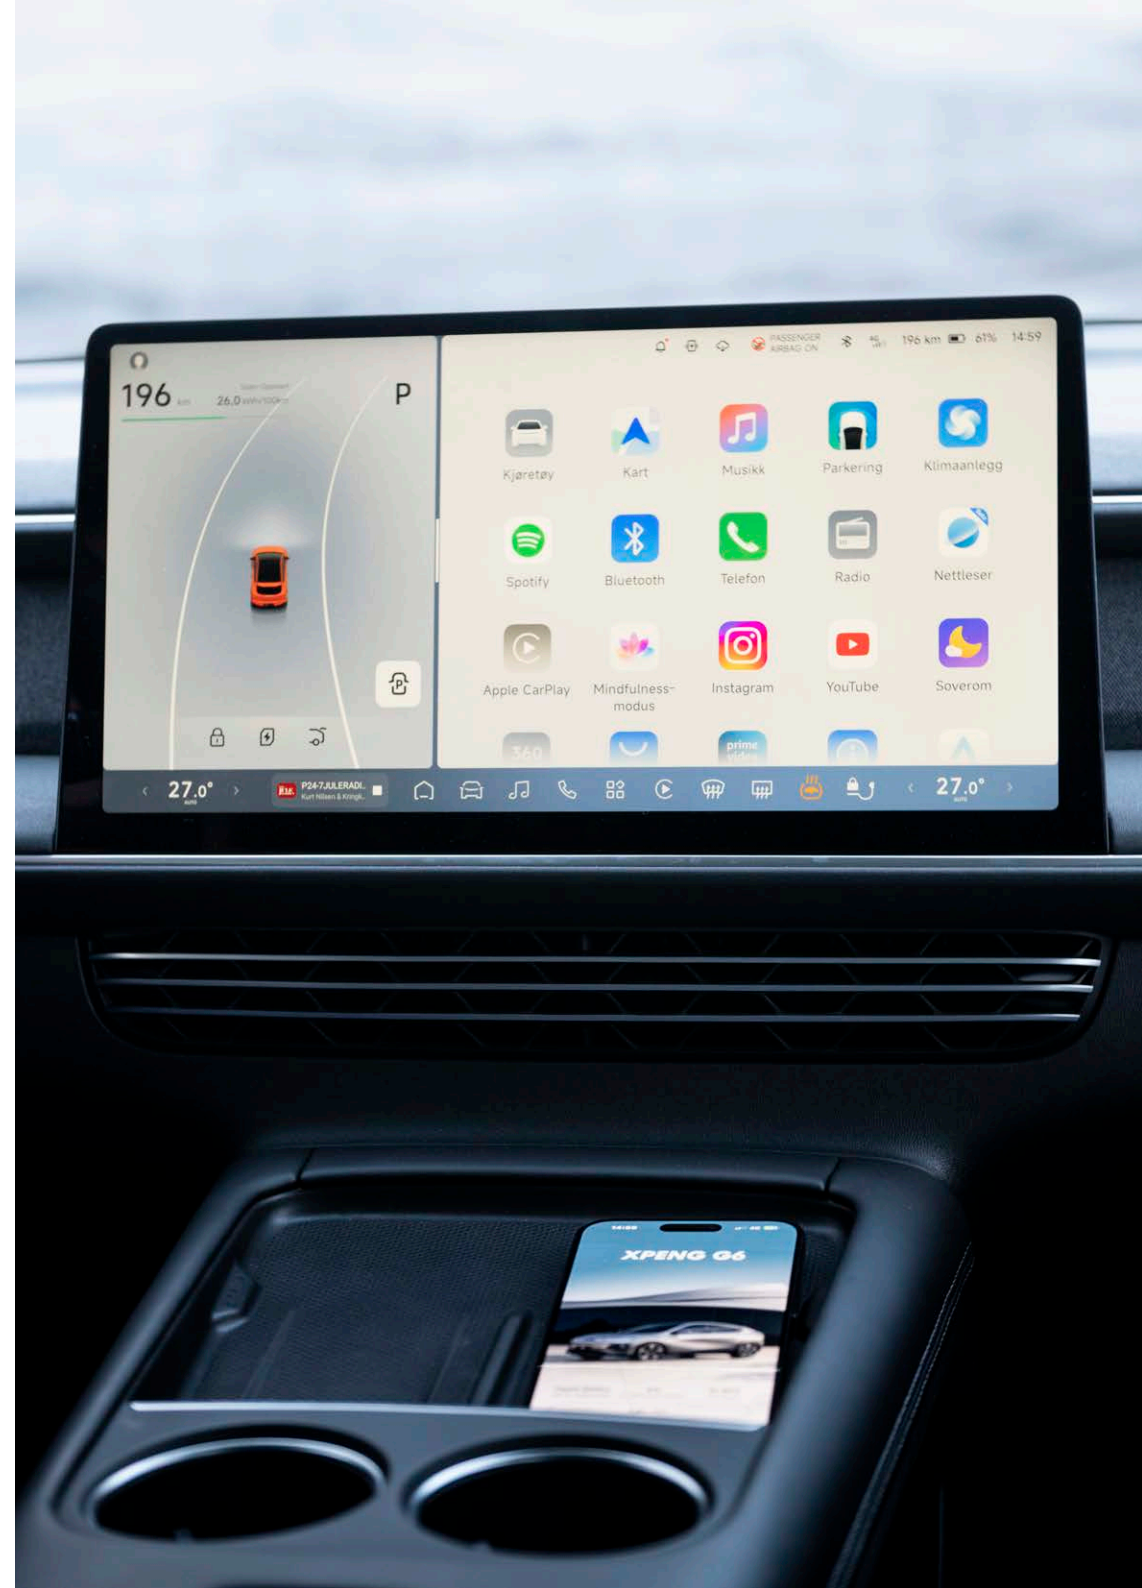

Xmart OS

The G6 is powered by the latest version of XPENG's Xmart OS, delivering an intuitive infotainment experience. It comes standard with all the comfort-enhancing features and XPILOT driver assistance systems that highlight XPENG's cutting-edge technology. Additionally, our enhanced voice assistant that can understand and respond to complex commands from all four zones of the car, even without a network connection.

03

XPENG APP

The XPENG App allows drivers to remotely lock and unlock their vehicle, view battery status, track the vehicle through GPS and to enhance comfort the cabin temperature can be pre set. With these functions and many more, the application is designed to enhance the electric driving experience, the XPENG App puts intelligent vehicle management right in your pocket.

18-SPEAKER XOPERA SOUND SYSTEM

All 18 speakers (including 2 driver seat stereos) are equipped with the Xopera sound system, which has been masterfully tuned, 7.1.4 panoramic effective technology, and self-developed acoustic algorithms to create mind-blowing sound effects.

01

Three-layer composite paper cone speakers

- "Sandwich" structure, paper + EPP + paper, the upper layer of high-end materials has beautiful appearance and texture; the middle layer of EPP material is lightweight, good damping; the bottom layer of composite pulp has a high degree of rigidity, solid support.

- Effectively ensure that the bass is elastic, deeper and more infectious sound.

02

KEVLAR diaphragm speaker

- Bulletproof fiber material, outstanding transient response; tone is more fluid, natural, and layered. Ideal for fast-paced songs with rapid and frequent changes in tone and volume.

03

Titanium membrane speaker

- Fine and transparent treble, good metallic performance, clear tone, especially in the appreciation of symphonic music and pop tunes, the effect is better.

04

Spatial sound 2.0, building the cockpit surround sound effect

- Based on the theory of psychoacoustic binaural localization of the sound source, the position and orientation of each speaker are optimized to broaden the sound's width.

- Each occupant of the vehicle can feel the "emperor position" of listening delight thanks to the 7.1.4 panoramic sound effect technology, which increases the degree of music extension and thus the sound field.

05

Lossless restoration algorithms for the highest possible quality of any type of music

- Repairing lossy music with the player's low bit rate to achieve lossless-like sound quality, which can improve the sound quality of digitally compressed audio

- The vehicle reproduces the original sound by compensating the sound field and recovering the high-frequency sound, allowing every type of regular music to be delivered in flawless increases the degree of music extension and thus the sound field.

06

Vocal beautification algorithms, as if you were listening live

• Improved some of the vocal overtones for a more genuine and intimate sound signature.

• A more immersive vocal image and richer vocal expression without distorting the sound.

ELECTRIC CHARGING & PERFORMANCE

Long Range

Range: Up to 354 miles (569 km) on a single charge

DC charging power: 280 kW

DC Fast Charging: 20% to 80% in under 20 minutes.

Acceleration 0-62 mph: 6.2 sec

Standard Range

Range: Up to 270 miles (434 km) on a single charge

DC charging power: 215 kW

DC Fast Charging: 20% to 80% in under 20 minutes.

Acceleration 0-62 mph: 6.6 sec

BATTERY AND POWERTRAIN

Battery Capacity: Both the Long Range and Standard Range models feature advanced lithium-ion battery systems that ensure efficiency, longevity, and power. The batteries are optimized for maximum energy density and performance.

Motor Power: The G6's powerful electric motor provides smooth acceleration and responsive handling, delivering a satisfying driving experience in both range versions.

ELECTRIC EFFICIENCY

Regenerative Braking: The G6 features regenerative braking, which helps recover energy during braking, improving overall efficiency and extending the vehicle's range.

Zero Emissions: As a fully electric vehicle, the G6 produces no tailpipe emissions, contributing to a cleaner environment.
